

The aim of Wenea's Quality and Environmental Policy is to be a management tool that contributes to the improvement of business processes and services, firmly committed to the reduction of CO2 emissions, always seeking to increase customer satisfaction and consolidating itself as a benchmark company in the sectors in which it operates, thanks to its quality and respect for the environment.

Our organisation has implemented a Quality and Environment Management System based on ISO 9001 and ISO 14001 standards.

In order to achieve these objectives, it has established the following principles:

Customer satisfaction to be front and centre of our company. Only in this way are stable and lasting relationships with current and future customers enhanced.

Establish quality and environmental objectives for improving the Integrated System and its monitoring.

- Continuously improving the management system by implementing suggestions by external organisations by way of feedback to us.
- Preserve and protect the natural environment by committing to reduce CO2 emissions produced by our operations.
- Optimise energy and water consumption, and work for the prevention, reduction and correct disposal of all types of waste and pollution.
- To understand the level of satisfaction of customers, workers and wider society in general, and adapt our policies to meet their needs.
- To enhance the human factor as an essential principle of quality and the environment. Only with the most effective human capital, training, communication, active participation and teamwork of all the people who are part of the organisation will business excellence be achieved.
- Allocate sufficient human, technological and financial resources to achieve the quality and environmental objectives set.
- Operate within the framework of relevant legislation and maintain an up-to-date record of legal regulations, which allows to ensure compliance with the legal and additional requirements that the organisation establishes.

The review, improvement and adherence to this commitment represents a tool for continuous improvement of the Integrated Management System and is a strategic factor in its development.

Only with the involvement and effort of each member of the organisation will we be able to guide the service to excellence and provide a social and professional benefit to our staff and the society of which we are a part.

Approved by Marta Sánchez, Direction of Systems, Processes and Support.
